

Luminesse ZR

As one of the forerunners of high aesthetic zirconia, we have consistently pushed the boundaries in the field of dental materials. The culmination of our efforts has resulted in the development of Luminesse zirconia. This material is the perfect blend of strength and aesthetics, offering an unparalleled level of translucency and depth to your restorations. Luminesse zirconia is perfect for creating full contour anterior and posterior cases, and can be used effectively to produce anything from a single unit to a 14 unit bridge.

- Premium Quality
- Strength & Durability
- High Strength for Frameworks
- High Translucency for Full Contour

Talladium is dedicated to constant research and improvement of our materials to arrive at the absolute cutting edge of development in the field of dentistry. Luminesse zirconia reflects our dedication to proven reliability and unwavering quality
